REGULATORY FRAMEWORK

Regulators and primary legislation

Which bodies regulate aviation in your country? Under what basic laws?

Transport, including civil aviation, falls within the competencies of the Ministry of Infrastructures.

The two main authorities in the civil aviation sector are the Portuguese Civil Aviation Authority (ANAC) and NAV Portugal EPE (NAV).

ANAC is the independent regulatory authority for civil aviation. It has powers to license, certify, authorise and approve the activities and procedures, entities, personnel, aircraft, infrastructure, equipment, systems and other means allocated to civil aviation, as well as to define the requirements and technical assumptions underlying the issuance of relevant legislation. Furthermore, ANAC has the powers to organise, retain and keep updated the national aeronautical register, regarding Portuguese aircraft and its parts and components. ANAC's statutes were approved by Decree-Law 40/2015, as amended.

NAV is the entity responsible for providing air traffic services in Portugal (including in both autonomous regions – the Azores and Madeira) and its statutes were approved by Decree-Law 404/98, as amended. Pursuant to Decree-Law 7/2020, which amended Decree-Law 109/2008, NAV became the coordinator for the slot allocation process and the schedules facilitator. NAV is also the manager of radio spectrum frequencies in the civil aviation sector on Lisbon FIR and Santa Maria FIR (ANAC Resolution 340/2022).

A number of other entities play a role in the aviation sector, in particular the Aircraft and Railways Accident Prevention and Investigation Office, whose current statute is governed by Decree-Law 36/2017, as amended.

Law stated - 12 May 2023

AVIATION OPERATIONS

Safety regulations

How is air transport regulated in terms of safety?

Air transport in Portugal is governed by national, EU and international rules.

On an international level, Portugal is bound by the Chicago Convention, among other international conventions.

On an EU level, and specifically regarding civil aviation safety, the key regulation is the Basic Regulation (2018/1139) on common rules in the field of civil aviation that established an EU Aviation Safety Agency. Each of the matters covered by this regulation is further governed by other EU statutes (generally implementing or delegating regulations), including the Initial Airworthiness Regulation (748/2012), as amended, and the Rules for Aircrew Regulation (1178/2011), as amended.

The above international and EU legislation is complemented by national legislation and by rules issued by the Portuguese Civil Aviation Authority (ANAC).

Law stated - 12 May 2023

What safety regulation is provided for air operations that do not constitute public or commercial transport, and how is the distinction made?

The safety of air operations is governed by various statutes. Air Operations Regulation (965/2012), as amended, is

applicable to both commercial and non-commercial operations. In particular, Annex VI (Part-NCC) applies to non-commercial operations with complex motor-powered aircraft), Annex VII (Part-NCO) applies to non-commercial operations with aircraft other than complex motor-powered aircraft and Annex III (Part-ORO) applies to operators of complex motor-powered aircraft, both commercial and non-commercial.

Under this regulation, 'commercial operation' refers to any operation of an aircraft, in return for remuneration or other valuable consideration, that is available for the public or, when not made available to the public, that is performed under a contract between an operator and a customer, where the latter has no control over the operator.

It is also worth mentioning that this regulation is also applicable to non-commercial specialised operations (ie, any operation other than commercial air transport where the aircraft is used for specialised activities such as agriculture, construction, photography, surveying, observation and patrol, and aerial advertisement).

There are also certain national rules on these matters, such as Aeronautical Information Circular No. 08/2021 on authorisations for specialised commercial operations (Part-SPO) or non-specialised commercial operations (Part-NCO).

Law stated - 12 May 2023

Market access

How is access to the market for the provision of air transport services regulated?

The Air Services Regulation (1008/2008), as amended, on the common rules for the operation of air services in the European Union is the most important regulation on air transport services within the European Union and is directly applicable to Portuguese air carriers.

Under the regulation, carriage by air of passengers, mail or cargo for remuneration or hire, or both, is subject to the appropriate operating licence. The issuance of such licence is dependent on compliance with various requirements, including, among others:

- holding a valid air operator certificate issued in accordance with the Basic Regulation;
- having one or more aircraft at its disposal through ownership or a dry lease agreement;
- having as its main occupation the operation of air services in isolation or combined with any other commercial operation of aircraft, or the repair and maintenance of aircraft;
- complying with the insurance requirements; and
- complying with the provisions on good repute.

Non-scheduled air services are subject to Decree-Law 19/82 , as amended. Finally, to operate extra-EU scheduled flights, air carriers are required to obtain specific operations authorisations from ANAC pursuant to Decree-Law 116/2012 .

All of the above licences and authorisations are subject to the validity of the air operator certificate (AOC).

Law stated - 12 May 2023

Ownership and control

What requirements apply in the areas of financial fitness and nationality of ownership regarding control of air carriers?

The Air Services Regulation regulates the financial requirements that an EU air carrier must meet in order to be granted an operating licence.

As a general rule, if an undertaking applies for the first time for an operating licence, it shall be able to demonstrate that:

- it can meet its current and potential obligations established under realistic assumptions at any time, for a period of 24 months from the start of operations; and
- it can meet its fixed and operational costs incurred by operations according to its business plan and established under realistic assumptions, for a period of three months from the start of operations, without considering any income from its operations.

For the purposes of that assessment, each applicant shall submit a business plan for, at least, the first three years of operation. Moreover, a first-time applicant must provide various pieces of information, such as:

- the most recent internal management accounts and, if available, audited accounts for the previous financial year;
- a projected balance sheet, including profit-and-loss account, for the following three years; and
- the basis for projected expenditure and income figures on items such as fuel, fares and rates, salaries, maintenance, depreciation, exchange rate fluctuations, airport charges, air navigation charges, ground handling costs, insurance and traffic/revenue forecasts.

On a national level, financial capacity is assessed under Decree-Law 116/2012 on extra-EU scheduled flights, by demonstrating that the operation of the air services in question is an economically profitable activity that does not adversely affect the financial capacity of the air carrier. Financial capacity should also be demonstrated under Decree-Law 19/82, as amended, on non-scheduled air transportation.

The Air Services Regulation sets forth that the air carrier must be owned, by more than 50 per cent, by member states or their nationals, or both, and be effectively controlled thereby, whether directly or indirectly, through one or more intermediate undertakings, unless provided for in an agreement to which the European Union is a party with a third country.

Under Decree-Law 116/2012, the authorisation to operate extra-EU scheduled flights is dependent on, among other requirements, the existence of an operating licence under the Air Services Regulation. Therefore, the nationality of ownership requirement mentioned above should be complied with under Decree-Law 116/2012.

Lastly, Decree-Law 19/82, as amended, imposes no nationality of ownership requirement.

Law stated - 12 May 2023

Licensing

What procedures are there to obtain licences or other rights to operate particular routes?

According to the Air Services Regulation, as a rule, any licensed air carrier may freely provide intra-EU air services. Nevertheless, there are specific exceptions. For instance, in a proportional, adequate, non-discriminatory and transparent manner, an EU member state may refuse, limit or impose conditions on the exercise of traffic rights to deal with sudden problems of short duration resulting from unforeseeable and unavoidable circumstances.

The exercise of traffic rights in extra-EU scheduled flights to or from Portugal is subject to an authorisation from ANAC pursuant to Decree-Law 116/2012.

Law stated - 12 May 2023

What procedures are there for hearing or deciding contested applications for licences or other rights to operate particular routes?

Considering the public body nature of ANAC, its acts may be challenged under the general administrative rules, in particular as provided for in the Administrative Procedure Code (Decree-Law 4/2015 , as amended) and in the Code of Procedure before the Administrative Courts (Decree-Law 15/2002 , as amended). Pursuant to ANAC's statutes, any disputes concerning administrative penalties must be subject to the specialised court of competition, regulation and supervision.

Law stated - 12 May 2023

Competition policy

Is there a declared policy on airline access or competition? What is it?

Portugal does not have a sector-specific policy on airline access or competition.

Law stated - 12 May 2023

Requirements for foreign carriers

What requirements must a foreign air carrier satisfy to operate in your country?

From a strictly regulatory standpoint, under Regulation 1008/2008 (the Air Services Regulation), no undertaking established in the European Union (including in Portugal) shall be permitted to carry by air passengers, mail or cargo for remuneration or hire unless it has been granted the appropriate operating licence.

If the foreign air carrier is an EU air carrier and it wishes to provide intra-EU air services, it must comply with the Air Services Regulation. If such EU air carrier wishes to provide extra-EU scheduled air services to and from Portugal, it must comply with Decree-Law 116/2012, in the same way a Portuguese carrier would have to.

If the foreign air carrier is not an EU air carrier and wishes to fly to Portugal, in case of scheduled air services, it should, as a rule, comply with any requirements provided for in the specific bilateral air services agreement. In case of non-scheduled air services, it should comply with Decree-Law 274/77 , as amended – that is, in principle, it will be subject to a notification or authorisation regime depending on the classification under which such flights fall.

From a safety standpoint, without prejudice to other rules, Basic Regulation applies to the operation of aircraft into, within, or out of the territory to which the Treaties apply by a third country aircraft operator and Commission Regulation (EU) No. 452/2014 lays down technical requirements and administrative procedures related to air operations of third country operators.

Law stated - 12 May 2023

Public service obligations

Are there specific rules in place to ensure aviation services are offered to remote destinations when vital for the local economy?

Under the Air Services Regulation, EU member states, 'following consultations with the other Member States concerned and after having informed the Commission, the airports concerned and air carriers operating on the route' have the

right to:

'impose a public service obligation in respect of scheduled air services between an airport in the Community and an airport serving a peripheral or development region in its territory or on a thin route to any airport on its territory any such route being considered vital for the economic and social development of the region which the airport serves. That obligation shall be imposed only to the extent necessary to ensure on that route the minimum provision of scheduled air services satisfying fixed standards of continuity, regularity, pricing or minimum capacity, which air carriers would not assume if they were solely considering their commercial interest. The fixed standards imposed on the route subject to that public service obligation shall be set in a transparent and non-discriminatory way.'

Also, given the geographic particularities of the Portuguese territory, comprising both the continental mainland and two archipelagos (the Azores and Madeira autonomous regions), Decree-Law 138/99, as amended, regulates the public services obligations in the specific context of the regular flights:

- between the mainland and the archipelagos;
- between the archipelagos;
- within any archipelago; or
- to any peripheral or less developed region of the Portuguese territory.

Law stated - 12 May 2023

Charter services

How are charter services specifically regulated?

Charter services are, in general terms, regulated by the same rules and regulations as applicable to scheduled air services. For instance, they are required to:

- comply with the Air Services Regulation;
- hold a valid air operator certificate issued in accordance with the Basic Regulation; and
- comply with Decree-Law 19/82, as amended.

Law stated - 12 May 2023

Regulation of airfares

How are airfares regulated?

The Air Services Regulation sets forth the general pricing freedom principle (with the exception of the public services obligations), according to which EU air carriers may freely set airfares for intra-EU services. This freedom is extended to third-country air carriers, on a reciprocity basis.

Under Decree-Law 116/2012, on extra-EU air services, there are no specific restrictions applicable to prices, but such prices may be taken into account to award traffic rights. Nevertheless, rules on airfares may be provided in bilateral air services agreements.

Law stated - 12 May 2023

Drones

How is the operation of unmanned aircraft systems (drones) regulated?

On 31 December 2020, the European regulation on rules and procedures for the operation of unmanned aircraft (Regulation 2019/947) became fully applicable in Portugal. The following regulations are now directly applicable:

- the Basic Regulation (2018/1139);
- the Unmanned Aircraft Systems (UAS) and Third-Country Operators of UAS Delegated Regulation (2019/945), as amended; and
- the Unmanned Aircraft Operation Implementing Regulation (2019/947), as amended.

Certain provisions of national statutes remain in force, such as the ANAC Regulation 1093/2016, Decree-Law 58/2018 and others related to image capturing.

The U-Space legislative package entered into force on 26 January 2023:

- Commission Implementing Regulation (EU) 2021/664 of 22 April 2021, as amended by Commission Implementing Regulation (EU) 2023/203, on a regulatory framework for the U-Space;
- Commission Implementing Regulation (EU) 2021/665 of 22 April 2021, amending Implementing Regulation (EU) 2017/373 regarding requirements for providers of air traffic management (ATM) and air navigation services, and other ATM network functions in the U-Space airspace designated in controlled airspace; and
- Commission Implementing Regulation (EU) 2021/666 of 22 April 2021, amending Regulation (EU) No. 923/2012 regarding requirements for manned aviation operating in U-Space airspace.

More recently, Decree-Law 87/2021, of 20 October 2021 approved operating rules and the penalty system applicable to unmanned aircraft.

Law stated - 12 May 2023

AIRCRAFT

Aircraft register

Who is entitled to be mentioned in the aircraft register? What requirements or limitations apply to the ownership of an aircraft listed on your country's register?

Aircraft are registered with the National Aeronautic Registry (NAR). The initial registration of an aircraft or independent equipment (such as engines or rotors) is made upon the submission of a registration request through a specific form made available by ANAC and should be filed along with certain documents, namely:

- sale and purchase agreement or a bill of sale;
- deregistration certificate from the previous registration country's aeronautical registry, or a non-registration certificate;
- customs clearance certificate if the aircraft is imported from a non-EU member state; and
- two pictures of the aircraft, one taken from the front and a profile picture, with the nationality and registration marks painted on, in a 9x12 format, without margins and printed in natural colours.

In principle, the entity that is mentioned in the register is the owner (or owners) of said aircraft; however, depending on the specific transaction underlying the use of the aircraft, the lessee (for instance) may also be mentioned.

Law stated - 12 May 2023

Mortgage register

Is there a register of aircraft mortgages or charges? How does it function?

Yes. Mortgages over aircraft should be registered in the NAR and the interested party should fill in the mortgage registry form made available by the Civil Aviation Authority (ANAC), submitting it alongside an authenticated copy of the document that creates said mortgage, usually a mortgage deed.

Law stated - 12 May 2023

Detention

What rights are there to detain aircraft, in respect of unpaid airport or air navigation charges, or other unpaid debts?

Decree-Law 254/2012 , as amended, establishes the regulatory framework applicable to the concession of airport public service management to ANA – Aeroportos de Portugal SA. According to the decree-law's provisions, if an air carrier is in debt in respect of airport charges, any of its goods (including any aircraft) that are located at an airport or an airdrome may be detained until either the debt is fully paid or any judicial decision rendered.

Further, pursuant to the Performance and Charging Scheme in the Single European Sky Implementing Regulation (2019/317), EU member states shall ensure that effective, and proportionate enforcement measures for the collection of air navigation charges are applied where necessary. These measures may include denial of services, detention of aircraft or other enforcement measures in accordance with the law of the EU member state concerned.

Portugal has ratified the Convention on the International Recognition of Rights in Aircraft 1948 (the Geneva Convention). Pursuant to Portuguese law and the Geneva Convention, mortgages may be registered in Portugal and they may also be enforced.

Law stated - 12 May 2023

Maintenance

Do specific rules regulate the maintenance of aircraft? What are they?

There are at least three pieces of EU legislation regarding the maintenance of aircraft that we believe should be highlighted:

- the Basic Regulation (2018/1139), on common rules in the field of civil aviation and establishing an EU Aviation Safety Agency;
- the Airworthiness and Personnel Approval Regulation (1321/2014), as amended; and
- the Airworthiness and Environmental Certification Regulation (748/2012), as amended.

As for national legislation, Decree-Law 66/2003 , as amended, regulates the certification, approval and authorisation of the entities responsible for the conception, project, production and maintenance of civil aircraft, as well as the

certification, approval and authorisation of products, parts, components and equipment used in civil aviation.

Law stated - 12 May 2023

AIRPORTS

Ownership

Who owns the airports?

The state owns the airports that are open to international commercial operations.

Law stated - 12 May 2023

Licensing

What system is there for the licensing of airports?

Airports are subject to, among other statutes, the Basic Regulation and Commission Regulation (EU) No 139/2014 of 12 February 2014 laying down requirements and administrative procedures related to aerodromes. Aerodromes not covered by EU legislation are subject to Decree- Law 186/2007 of 10 May, as amended.

Additionally, in Portugal, Decree-Law 254/2012, as amended, establishes the regulatory framework applicable to the concession to ANA – Aeroportos de Portugal, SA (ANA) of the airport public service. ANA is also the entity responsible for licensing the use of the public domain at those airports.

Law stated - 12 May 2023

Economic regulation

Is there a system of economic regulation of airports? How does it function?

Yes. Decree-Law 254/2012, as amended, sets forth the rules for the economic regulation of the airports.

Such rules are applicable to:

- every airport and aerodrome located in the Portuguese territory that is open to commercial traffic, the annual traffic of which exceeds five million passengers;
- airport networks with an annual global traffic volume exceeding five million passengers; and
- airports or aerodromes submitted to economic regulation subject to a decision by ANAC.

The objective scope of such economic regulation is:

- the definition of common principles and rules applicable to the collection of charges paid by airport or aerodrome users for the use of facilities provided and services provided exclusively by the airport managing body in connection with the landing, take-off, lighting and parking of aircraft, and the processing of passengers, freight and mail; and
- setting the quality of service indicators to be observed at airports and aerodromes.

Law stated - 12 May 2023

Access

Are there laws or rules restricting or qualifying access to airports?

Both EU regulations and Portuguese legislation apply to access to airports. For instance, regarding security, two EU regulations may be highlighted:

- the Aviation Security Regulation (300/2008), as amended; and
- the Aviation Security Implementing Regulation (2015/1998), as amended.

Furthermore, Decree-Law 254/2012, as amended, states that without prejudice to the rules applicable to the use of the airport public domain, the occupation of land, buildings or other facilities, and the exercise of any activity and service in the area of airports and national public aerodromes, require a licence from the airport managing entities that are entrusted with its management and operation.

Law stated - 12 May 2023

Slot allocation

How are slots allocated at congested airports?

Pursuant to the Slot Regulation (95/93), the congested airports in Portugal shall be designated as 'coordinated'. Decree-Law 109/2008, as lastly amended by the Decree-Law No. 7/2020, designates as 'coordinated airports' the following:

- Lisbon Airport;
- Porto Airport;
- Madeira Airport; and
- Faro Airport, during the International Air Transport Association's summer period.

Slots in congested Portuguese airports are allocated according to the Slot Regulation (95/93).

Law stated - 12 May 2023

Ground handling

Are there any laws or rules specifically relating to ground handling? What are they?

Decree-Law 275/99, as amended, regulates ground handling activities, including the provisions regarding the licensing of ground handling operators and market access. This statute takes into account the rules provided for in the Council Directive 96/67/EC of 15 October 1996 on access to the ground handling market at Community airports.

Recently, Regulation (EU) 2020/696, which amended Air Services Regulation, provided for temporary rules on the supply of ground handling services at EU airports, in the context of the covid-19 pandemic and derogated some provisions of the Council Directive 96/67/EC.

Law stated - 12 May 2023

Air traffic control

Who provides air traffic control services? And how are they regulated?

NAV Portugal EPE is the entity responsible for providing air traffic services in Portugal. Its statutes were approved by Decree-Law 404/98, as amended.

The provision of air traffic management and air navigation services (ATM/ANS) in the Single European Sky airspace and the design, production, maintenance and operation of systems and constituents used in the provision of those ATM/ANS is subject to, among other statutes, the Basic Regulation (2018/1139), which establishes common rules in the field of civil aviation and establishing a European Union Aviation Safety Agency and relevant regulations (including implementing regulations, such as Regulation (EU) 2017/373).

Law stated - 12 May 2023

LIABILITY AND ACCIDENTS

Passengers, baggage and cargo

What rules apply in respect of death of, or injury to, passengers or loss or damage to baggage or cargo in respect of domestic carriage?

The Carrier Liability Regulation (2027/97), as amended, implements the relevant provisions of the Montreal Convention in respect of the carriage of passengers and their baggage by air and lays down certain supplementary provisions. It also extends the application of these provisions to carriage by air within a single member state.

Decree-Law 321/89 , as amended, on mandatory insurance contract in air transport activity also sets forth provisions on this matter.

Law stated - 12 May 2023

Surface damage

Are there any special rules about the liability of aircraft operators for surface damage? What are they?

Yes, Order 287/96 establishes limits to the amounts of compensation based on liability for surface damage caused by aircraft in flight or by their loose objects. Decree-Law 321/89, as amended, on mandatory insurance contracts in air transport also sets forth provisions on this matter.

Portugal signed the 1952 Convention on Damage Caused by Foreign Aircraft to Third Parties on the Surface, but it has not yet ratified it.

Law stated - 12 May 2023

Accident investigation

What system and procedures are in place for the investigation of air accidents?

The Civil Aviation Accident Investigation and Prevention Regulation (996/2010), as amended, establishes the main principles and procedures that shall be followed for the investigation of air accidents:

- that occur in the territory of any EU member state;
- that, having occurred outside the EU territory, involve aircraft registered in a member state or operated by an air carrier established in a member state, when such investigations are not to be conducted by another state;
- in which a member state is entitled to appoint an accredited representative to participate as a state of registry, state of the operator, state of design, state of manufacture or state providing information, facilities or experts by request of the state conducting the investigation; or
- in which a member state, having special interest by virtue of fatalities or serious injuries to its citizens, is permitted by the state conducting the investigation to appoint an expert.

Among other measures, this regulation establishes the obligation of each member state to create an independent safety investigation authority and, together, to establish an EU Network of Civil Aviation Safety Investigation Authorities seeking to promote information sharing and cooperation between the authorities.

Pursuant to that regulation, the Aircraft and Railways Accident Prevention and Investigation Office (GPIAAF), which is responsible for the investigation of accidents and incidents involving civil aircraft, was created and is currently governed by Decree-Laws 318/99 and 36/2017.

Under these decree-laws, the GPIAAF shall be notified of all accidents that occur within the Portuguese territory or its air space, irrespective of the type of aircraft involved.

Upon notice of an accident, the GPIAAF's director should designate an investigator-in-charge, responsible for directing the investigation. If deemed necessary, other entities with expertise in other fields of knowledge may be required to collaborate with the investigation.

Law stated - 12 May 2023

Accident reporting

Is there a mandatory accident and incident reporting system? How does it operate?

Yes. Pursuant to Regulation (EU) No. 376/2014 of the European Parliament and of the Council of 3 April 2014 on the reporting, analysis and follow-up of occurrences in civil aviation (as amended) and the Commission Implementing Regulation (EU) 2015/1018 of 29 June 2015, laying down a list classifying occurrences in civil aviation to be mandatorily reported (as amended), there are certain occurrences that are mandatory to report and others that are voluntary to report.

The Portuguese entities that receive these reports are the Civil Aviation Authority (ANAC) and the GPIAAF.

The Decree-Law no. 44/2023, of 12 June, establishes the penalty system applicable to infringements of the rules set out in Regulation (EU) No. 376/2014 on occurrence reporting, analysis and follow-up in civil aviation.

Additionally, ANAC Aeronautical Information Circulars 07/2021 and 19/2021, among others, further regulate the occurrences communication system.

Law stated - 12 May 2023

COMPETITION LAW

Specific regulation

Do sector-specific or general competition rules apply to aviation?

The aviation sector is subject to general competition rules established in the Portuguese Competition Act (Law

19/2012, as amended by Law 17/2022), as well as EU competition rules.

Law stated - 12 May 2023

Regulator

Is there a sector-specific regulator, or are competition rules applied by the general competition authority?

The Portuguese Competition Authority (PCA) is the entity entrusted to apply and enforce national and EU (when applicable) competition rules. Pursuant to the Portuguese Competition Act, ANAC is entitled to issue opinions prior to the adoption of decisions by the PCA, concerning the aviation sector, in the fields of both antitrust and merger control.

Law stated - 12 May 2023

Market definition

How is the relevant market for the purposes of a competition assessment in the aviation sector defined by the competition authorities?

The PCA's practice in the aviation sector is, in general terms, aligned with the one from the European Commission (EC). The PCA has defined product and geographic markets that correspond to the airline routes – that is, to the pairs of origin or destination (O/D) in which the undertakings concerned have overlapping activities – and has defined separate product markets for air transport of passengers and air transport of cargo or mail. The combinations of O/D include all airports at the same destination, as the PCA has not found the need to analyse and define markets more narrowly. Concerning the air transport of passengers, the PCA has generally indicated that the assessment of whether direct and indirect flights form part of the same market or route should be done on a case-by-case basis. Separate markets have been identified for services relating to air transport, such as ground handling services and catering services.

Law stated - 12 May 2023

Code-sharing and joint ventures

How have the competition authorities regulated code-sharing and air-carrier joint ventures?

There are no specific rules regarding these arrangements. However, code-sharing and other air carrier agreements may fall under the scope of the general prohibition of agreements and concerted practices between undertakings that restrict competition by object or effect, under both Portuguese and EU law. So far, the PCA has not issued any decisions regarding anticompetitive practices in the air transport sector.

As for air carrier joint ventures, these may be subject to the general Portuguese and EU rules on merger control and, therefore, subject to mandatory prior notification and clearance by the PCA or the EC, provided they constitute full-function joint ventures and the notification thresholds (in terms of turnover or market share in the affected markets) are met.

Law stated - 12 May 2023

Assessing competitive effect

What are the main standards for assessing the competitive effect of a transaction?

Under the Portuguese Competition Act, the assessment of a transaction under merger control rules is based on the analysis of whether such transaction is likely to create significant impediments to effective competition in the domestic market or a substantial part of it, in particular if the impediments result from the creation or reinforcement of a dominant position in a given relevant market. For the purposes of this assessment, the PCA will take into consideration several factors, such as:

- the structure of the relevant markets;
- the position of the companies involved in the transaction compared with those of their main competitors;
- potential competition; and
- the existence, in fact or in law, of barriers to entry into the market.

As indicative remark, in the air transport sector, Case Ccent 12/2009 – TAP/SPdH was blocked by the PCA as it found that the transaction would reinforce a dominant position in the market for ground handling services in the airports of Lisbon, Porto, Faro, Funchal and Porto Santo, as well as in the related market for the air transport of passengers. Since the merger was implemented before the notification, the PCA imposed several measures to revert it and re-establish effective competition between the parties.

Law stated - 12 May 2023

Remedies

What types of remedies have been imposed to remedy concerns identified by the competition authorities?

The PCA may subject the approval of a merger to the adoption of either structural (ie, divestment of businesses or assets, or both) or behavioural commitments. In principle, structural commitments are preferred to behavioural ones, as the first generally allow the entry of new market players. In relation to divestment commitments, the acquirer of the divested business or asset is subject to prior approval by the PCA in order to constitute a viable and competitive alternative in the relevant market.

As indicative remark, in the air transport sector, the PCA has approved both structural and behavioural commitments in Case Ccent 57/2006 - TAP/Portugália, which were specifically aimed at permitting the entry of a new market player in the Lisbon–Porto route. The main commitments consisted of:

- providing slots at Lisbon and Porto Airports for a new entrant having an offer capacity at least equivalent to the target company;
- freezing the number of flights operated by the acquirer on the affected routes; and
- providing passenger fees equivalent to that of highly competitive routes.

FINANCIAL SUPPORT AND STATE AID

Rules and principles

Are there sector-specific rules regulating direct or indirect financial support to companies by the government, government-controlled agencies or companies (state aid) in the aviation sector? Is state aid regulated generally?

State aid is a matter dealt with only at EU level. Thus, the rules established by article 107 of the Treaty on the Functioning of the European Union (TFEU), which contains a general prohibition on state aid, as well as the State Aid General Block Exemption Regulation (Commission Regulation (EU) 651/2014 – GBER), are applicable in Portugal. When granting state aid in the aviation sector, the Portuguese Authorities should also consider the EC Guidelines on State Aid to Airlines and Airports (2014/C 99/03), which, although not binding to the Courts, establish the conditions under which EU member states can grant state aid to airlines and airports.

Law stated - 12 May 2023

What are the main principles of the state aid rules applicable to the aviation sector?

The EC Guidelines on State Aid to Airlines and Airports are aimed at promoting the sound use of public resources to allow effective aid measures while minimising distortions of competition. In general terms, these guidelines allow:

- investment state aid for airport infrastructure if there is a genuine transport need and the public support is necessary to ensure the accessibility of a region. The guidelines define maximum aid intensities depending on the size of an airport, allowing higher amounts for smaller airports than for larger ones;
- operating aid to regional airports (with fewer than three million passengers a year) for a transitional period of 10 years under certain conditions to give airports time to adjust their business model. To receive operating aid, airports need to work out a business plan paving the way towards full coverage of operating costs at the end of the transitional period; and
- start-up aid to airlines to launch a new air route, provided it has a time-limit.

Law stated - 12 May 2023

Exemptions

Are there exemptions from the state aid rules or situations in which they do not apply?

EU law establishes that de minimis aid (ie, up to €200,000 per undertaking over any period of three fiscal years), does not fall under the scope of the general state aid prohibition, pursuant to the De Minimis Aid Regulation (Commission Regulation (EU) 1407/2013). Furthermore, aid covered by the GBER is considered automatically approved and compatible with the internal market, without the need for notification and prior approval by the EC, provided the conditions established in the GBER are fulfilled.

Law stated - 12 May 2023

Clearance of state aid

Must clearance from the competition authorities be obtained before state aid may be granted?
What are the main procedural steps for doing so?

Any state aid measure is bound to mandatory prior notification to the EC, meaning that there is a standstill obligation

that must be complied with (except for the cases falling under the exemption measures) and must follow EU regulatory procedure. Therefore, a notification will trigger a preliminary investigation by the EC, which has a two-month period to either adopt a decision or open a formal investigation under article 108(2) of the TFEU where it has serious doubts about the aid's compatibility with EU state aid rules. Should the notification be deemed incomplete, the EC may submit requests for information to the notifying member state, with the consequent deadline's restart. If an information request is not replied in the prescribed period of time, the notification is deemed to be withdrawn. In the end of the preliminary or formal investigation the EC can adopt one of the following decisions:

- a positive decision, finding that the measure does not constitute state aid or is compatible with EU law;
- a conditional decision, imposing conditions to ensure compatibility of the measure; or
- a negative decision, blocking implementation of a measure deemed incompatible with EU law.

Law stated - 12 May 2023

Recovery of unlawful state aid

If no clearance is obtained, what procedures apply to recover unlawfully granted state aid?

Should the EC conclude that a state measure already granted is incompatible with EU state aid law, it will open a recovery procedure. Under such procedure, the member state is obliged to recover the aid (with interest) from the beneficiary(ies), unless such recovery would be contrary to a general principle of EU law. If the decision is not complied with in due time, the EC may open an infringement procedure against the member state under article 258 of the TFEU. If the aid is not recovered within a 10-year period then its recovery becomes time barred.

Law stated - 12 May 2023

CONSUMER PROTECTION

Passengers

What rules regulate denied boarding, cancellation or (tarmac) delay?

The Flight Compensation Regulation (261/2004), as amended, is the main statute on this matter. Article 4 regulates the passengers' rights in case of denied boarding; article 5 applies to rights derived from flight cancellation; and article 6 regulates passengers rights if a flight gets delayed. In the context of the covid-19 pandemic, the European Commission issued the 'Interpretative Guidelines on EU passenger rights regulations in the context of the developing situation with COVID-19' and the Recommendation (EU) 2020/648 of 13 May 2020 on vouchers offered to passengers and travellers as an alternative to reimbursement for cancelled package travel and transport services in the context of the covid-19 pandemic.

An air carrier that does not grant the rights provided for in those rules may be sanctioned pursuant to Decree-Law 209/2005 that establishes the sanctioning system regime related to the Flight Compensation Regulation (261/2004).

Portugal has ratified the Convention for the Unification of Certain Rules for International Carriage by Air Montreal.

Law stated - 12 May 2023

Package holidays

What rules apply to the sale of package holiday products?

Following the adoption of the Package Travel Directive ((EU) 2015/2302), Decree-Law 17/2018 , as amended, was

issued to set forth the rules applicable to the access and performance of the tourism and travel agencies' activities in Portugal.

Law stated - 12 May 2023

Other consumer legislation

Is there any other aviation-specific consumer legislation?

Yes. The Passenger with Reduced Mobility Regulation (1107/2006) and Decree-Law 254/2012, as amended, should be highlighted. Decree-Law 254/2012 contains rules on the rights of disabled persons and persons with reduced mobility. More recently Decree-Law 82/2022 approved the regime applicable to accessibility to products and services, transposing Directive (UE) 2019/882, which is expressly applicable to air transport.

Law stated - 12 May 2023

INSURANCE AND SECURITY

Insurance for operators

What mandatory insurance requirements apply to the operation of aircraft?

The mandatory insurance requirements applicable in Portugal are established in a variety of legislative pieces, from which we want to highlight the following:

- the Aircraft Insurance Regulation (785/2004), as amended, the requirements of which apply to all air carriers and to all aircraft operators flying within, into, out of, or over the territory of an EU member state;
- Decree-Law 321/89 on mandatory insurance contract in air transport activity (as amended), which is applicable to the air carriage of passengers, baggage and cargo, including animals and mail, with aircraft registered in Portugal or any other aircraft that flies over the Portuguese air space;
- Decree-Law 223/2005, which sets out the appropriate minimum insurance cover to cover passenger liability in respect of non-commercial operations with aircraft and establishes the obligation to provide evidence of compliance with the minimum insurance requirements for aircraft pursuant to the Aircraft Insurance Regulation; and
- Decree-Law 58/2018, which establishes a mandatory civil liability insurance applicable to drones and drone operators, and is partially in force.

Law stated - 12 May 2023

Aviation security

What legal requirements are there with regard to aviation security?

Security is governed on the EU level predominantly by two statutes, although there are others. These two statutes are:

- the Aviation Security Regulation (300/2008), as amended, which establishes the common rules to protect civil aviation against acts of unlawful interference that jeopardise the security of civil aviation and also provides the basis for a common interpretation of Annex 17 to the Chicago Convention on International Civil Aviation; and
- the Aviation Security Implementing Regulation (2015/1998), as amended, which sets forth detailed measures for the implementation of the common basic standards for safeguarding civil aviation against acts of unlawful interference that jeopardise the security of civil aviation.

On a national level, Decree-Law 142/2019 approved the National Civil Aviation Security Programme and created the system of penalties applicable to the legal framework of the common basic standards on civil aviation security established by the Aviation Security Regulation (300/2008).

Law stated - 12 May 2023

Serious crimes

What serious crimes exist with regard to aviation?

Certain crimes related to aviation are punishable under Portuguese law, including:

- non-compliance with an order or rightful instruction to guarantee the safety, good order and discipline on board, issued by the aircraft commander or other crew member on his or her behalf, during a commercial flight in a civil aircraft (article 4 of Decree-Law 254/2003, as amended);
- disclosing false information related to the flight during a commercial flight in a civil aircraft, causing concern and anxiety among the passengers (article 4 of Decree-Law 254/2003, as amended);
- takeover or deviation from the normal route of an aircraft in flight with passengers on board (article 287 of the Criminal Code);
- jeopardising the safety of the aircraft by:
 - destroying, eliminating, damaging or disabling its facilities, material or signalling;
 - placing obstacles to its functioning or circulation;
 - issuing a false alarm or warning; or
 - performing an act from which a disaster may result (article 288 of the Criminal Code); and
- operating an aircraft without being able to do so safely or violating driving rules, and, by this conduct, causing a danger to someone's life, physical integrity or assets of high value (article 289 of the Criminal Code).

This list does not exclude criminal responsibility for crimes committed on board aircraft and that are able to be committed anywhere else (eg, murder or theft). When a crime against life, physical integrity, personal freedom, sexual auto-determination, dignity or property is committed on board and endangers the safety of the aircraft, the applicable penalty is increased by one-third in its minimum and maximum limits. This increase is subject, however, to a maximum of 25 years of imprisonment and a day fine of up to 900 days.

The Criminal Code is applicable to the crimes committed on board Portuguese aircraft.

The crimes set forth in Decree-Law 254/2003, as amended, are also punished when committed on board:

- an aircraft without crew, rented to an operator with its head office located in Portugal or established therein; and
- a foreign aircraft landing in Portugal with the alleged infringer still on board.

UPDATE AND TRENDS

Emerging trends

Are there any emerging trends or hot topics in air transport regulation in your jurisdiction?

TAP

The Portuguese state-owned flag carrier has been in the spotlight for several reasons, many involving its administration, and its financial restructuring plan, but also because of its planned privatisation. The expectation is that this process will be approved by July 2023, and many international airlines have already publicly shown their interest.

Sustainable aviation

Another trend much discussed across the sector is the need to ensure a greener aviation industry, namely by using sustainable aviation fuel (SAF). In this sense, many steps are being taking to address this issue, and the European Union has already agreed on a deal to set binding targets for airlines in Europe to increase their use of SAF, as well as to stimulate the market for green fuels.
